 Surface modifications correlated with structural and mechanical proper

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | This book describes the use of a femtosecond laser pulses in combination with dry and various liquid environments. It deals with the evolution of micro/nanostructures, variations in crystallinity and nanohardness after interaction of femtosecond laser pulses with silver surface. Formation of silver oxide, silver hydride and silver hydroxide due to enhancement of chemical reactivity of silver after femtosecond laser irradiation is discussed in correlation with the surface and mechanical properties. For this...
