Edinburgh Medical Journal, 1864 (Classic Reprint)

By Unknown Author

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Edinburgh Medical Journal, 1864 I traced the peculiar affection of the eyes to a morbid action of the muscles of both the eyelids and eyeballs, such that the lids were held wide open and the balls protruded; and I pointed out that there was a correlative affection in the drooping lids and retracted eyeballs observed in various diseases of the nervous system. I further showed that the results of recent experimental researches enabled us to trace two kinds of this nervous exophthalmos to two sources of disordered innervation - one of these local, and dependent on morbid states of the Gasserian ganglion or its cerebral centre; the other more general, and a motor neurosis of the oculo-spinal or cilio-spinal region of the spinal cord, being that portion which extends from the first cervical to the second dorsal vertebra. I showed further that this spinal kind of exophthalmos was one of the signs of horror, terror, and pain, and, as a symptom, accompanied various cerebral neuroses, as mania and melancholia, mania with epilepsy, and insanity with...
