## IDENTIFICATION EN BOUCLE FERMEE DE LA MACHINE ASYNCHRONE

Editions Universitaires Europeennes. Paperback. Condition: New. 212 pages. Dimensions: 8.7in. x 5.9in. x 0.5in. Ce mmoire de thse relate la mise au point dune mthodologie didentification en boucle ferme de la machine asynchrone, grce une prise en compte explicite de lalgorithme de commande vectorielle. Fondamentalement, lidentification directe pose des problmes en raison des perturbations stochastiques que lon retrouve sur la variable de commande via la boucle de rgulation, ce qui rend lestimation asymptotiquement biaise. Nous proposons de remdier ce problme grce une identification indirecte sur la base de la connaissance du correcteur. De plus, nous tendons le champ dapplication de cette approche en identifiant pralablement un correcteur quivalent laide dune technique de moindres carrs surparamtriss. Outre llimination du biais asymptotique, les tudes comparatives ralises en simulation stochastique ont montr que lapproche indirecte fournit des estimates plus prcises, et cela pour une excitation de la machine uniquement constitue par les variations du couple de charge. Cette nouvelle mthodologie a permis damliorer la dtction des dfauts, grce une meilleure rjection des fausses alarmes. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
