

Theory of Quantum and Classical Connections in Modeling Atomic, Molecular and Electrodynamical Systems

By Alexandru Popa

Oxford Elsevier LTD Okt 2013, 2013. Taschenbuch. Book Condition: Neu. 228x154x10 mm. Neuware - Quantum and Classical Connections in Modeling Atomic, Molecular and Electrodynamical Systems is intended for scientists and graduate students interested in the foundations of quantum mechanics, and on the other to applied scientists interested in accurate atomic and molecular models. This is a reference to those working in the new field of relativistic optics, in topics related to relativistic interactions between very intense laser beams and particles, and is based on 30 years of research. The novelty of this work consists of accurate connections between the properties of quantum equations and corresponding classical equations used to calculate the energetic values and the symmetry properties of atomic, molecular and electrodynamic systems, as well as offering applications using methods for calculating the symmetry properties and the energetic values of systems and the calculation of properties of high harmonics in interactions between very intense electromagnetic field and electrons. 72 pp. English.

Reviews

This pdf may be worth acquiring. It can be written in easy words and phrases and not hard to understand. I am pleased to tell you that this is basically the finest book I have read through during my personal existence and might be the greatest pdf for any time.

-- **Jeffry Tromp**

Totally among the best publication I actually have actually go through. It can be filled with wisdom and knowledge. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Glen Ernser**
