LANDSCAPE ECOLOGY FOR SUSTAINABLE SOCIETY

DOWNLOAD

Springer. Hardcover. Condition: New. The research category of the landscape ecology, which researches the structure, functions, and the spatio-temporal changes of the ecological landscapes, has now been contributing to the human life and the shifts of the socio-economic paradigm. Global warming has been influencing the universal life patterns of the mankind which have been maintained in the past several hundreds of years. And it has been having the influences on the international social problems and economic problems. Although the diverse plans for adapting to the climate changes have been the topics of the conservations among the ecologists internationally, it is the reality that the speed of the changes of the environment has been quicker than the time it takes to complete the solutions. In order to maintain the sustainable earth and the sustainable society, the role of the landscape ecology has been coming to the fore. Especially, the theories and the methodologies of the landscape ecology have been applied to the multidisciplinary researches by going beyond the research category of ecology, including the maximization of the efficiencies of the land spaces, the management of the ecological space (habitats) in which the biological diversity can be maintained, the utilization of the resources that are absolutely needed by the human beings (Here, it is compressed to water, energy, and food), etc. and until reaching the human society. It is considered that, to that extent, the utilizations and the applications of the landscape ecology are very much needed for the diagnoses and the evaluations of the global environmental problems which have been proceeded with rapidly in the modernity. This book is not comprised of any general remarks that explain the theories and the methods of the landscape ecology. Already, based on the basic theories of the landscape ecology, the writers have conducted the...
