I.K. International Publishing House Pvt. Ltd, 2017. Softcover. Condition: New. he book elaborates on the basics of procedure oriented programming and the fundamentals of writing C codes. The most noticeable feature of the book is the complete technical guidance for IT interview. It contains MCQs with 4 or 5 interesting options which prompts the candidate to think over a broad range of compilers. A brief and convincing answer for all the questions has been provided. It goes on to cover aspects like functions and loops, which will help novice programmers to code properly. Each concept is covered using tracing to explain how the particular coding construct and real- time programs works to help users understand how to implement theoretical concepts and obtain outputs to assure validity of programs written. Elementary programming concepts like arrays, loops, assignment operators, functions, file processing, data structures, etc. have been covered in the book. The flow of the book is organized in such a way that even a fresh candidate can easily follow the flow of concept and master the language at a comparatively faster rate. This book will act as placement assistant for the fresh IT candidates in the technical round (C language). Printed Pages: 422.
